UGA COMPUTER SCIENCE HONORS GRADUATE READY TO WORK

Structured and organized computer science honors graduate that performs well when multi-tasking. Investigative and detail-oriented, with a comprehensive understanding of programming languages, operating systems, and coding practices. Seeking to use acquired skills in coding, debugging, data structures, and agile software development during an entry-level or junior-level position to help a company get development work done in an efficient and timely manner.

Core Competencies

Problem Solving • Teamwork • Logical Thinking • Software Testing • Code Debugging • Object-oriented Design • Creativity
Information Gathering • Systematic Thinking • Research and Analysis • Leadership • Data Structuring • Verbal and Written
Communication • Organization • Detail-oriented

Technical Proficiencies: HTML | CSS | JavaScript | Node.js | MERN | React | SQL | MySQL | RESTful API | Bootstrap | MongoDB
Express | WordPress | jQuery | ASP Net Core | C# | Django | MVC | Figma | Git | Github | Visual Studio Code | Bulma | Tailwindcss |
Unix | XML Java | Python | PHP | C++ | Bash | Amazon Lex | Firebase | IntelliJ | Eclipse

WORK EXPERIENCE

Site Trustee

Web Consultant

Atlanta, GA | 2023

I review client websites and help them solve problems and make improvements to user experience, SEO and other aspects of site efficiency. Displayed skills with WordPress, troubleshooting, and SEO development.

PROJECTS

Gate's Pass	Gate's Pass came to Site Trustee because their original site was almost impossible to update, and as Site Trustee's web consultant, I was tasked to rebuild both its pages and posts from scratch. While I was excellent at writing CSS and html, I was pushed to use Beaver Builder which I was relatively new at. Fortunately, I quickly became familiar with the provided web elements I had at my disposal. I was also able to utilize my expertise in CSS to handle more complicated styles. By the end, I created a strong copy of the company's original website.
Ride Share App	In my mobile application development course, I worked with one other developer to create an Android mobile app that lets people share rides with each other to specific destinations. We struggled to integrate Google Firebase storage into our app, but after consulting other classmates and teachers, we figured out we were dealing with an async issue. We made our deadline, and created a good looking and functional mobile app and received an A.
Movie Booking System	As part a software engineering class at UGA, our professor challenged us to create a complex movie booking website. At first, it was hard to work in sync with each other, because we didn't have a fully developed work plan. Then we utilized SCRUM methodology to help the team be punctual and organized with their deliverables. By the end of the course, we created a professional-looking website and received an A on the project finishing well ahead of the deadline.

EDUCATION

Overall GPA: 3.61 | University of Georgia | Athens, GA

Bachelor of Science, Computer Science

May 2022

Relevant Course Work: Writing Code, Cleaning Data, Scrum Methodology, Programming, Code Maintenance, Data Visualization, GUI Development, Data Integration, Software Engineering, API Implementation, Software Lifecycle Determination

Bachelor of Science, Psychology

May 2022

Relevant Course Work: Complex Problem Solving, Design Implementation, Hypothesis Testing, Interface Testing, Database Development, Project Management, Continuous Process Improvement, Mathematics

Honors: Dean's List | Hope Scholarship

Georgia Tech | Atlanta, GA

Full Stack Coding Bootcamp

July 2023

Acquired Skills: Web Design, API Database Querying, RESTful Services, Team Management, Cloud Integration, MERN Wireframe, DOM, Asynchronous Calls, Writing Code Tests, Authorization Implementation, Stripe Payment System Integration

LEADERSHIP ACTIVITIES

Member of the National Society of Leadership and Success, 2018 - 2022

Member of LEAD for Georgia Southern University Leadership Development Program, 2016
